Subject: [External_Sender] RE: Question Related to Part 21 Report - Initial 10CFR Part 21 Notification , F10 Series MCC Cubicle stab alignment - Ref: P21-10042019-1

Ok I understand. I will make sure that I remove the statement in the future. Thank you for bringing it to my attention. You are correct, there is no proprietary information contained in the notification that was submitted.

Thank you,

Tracy Bolt

Hi ,

Thank you for submitting the subject 10 CFR 21 report. As you may or may not know, the NRC attempts to publish all Part 21 reports to the NRC public website in order to share important safety-related information with licensees and stakeholders. One of the reasons why we would not make a Part 21 report publicly available is if the submitter of the report requests that we withhold information from the public because the information is proprietary or confidential to their company. If this is the case, then the request to withhold this information must be submitted to the NRC in accordance with the requirements of 10 CFR 2.390 "Public inspections, exemptions, requests for withholding."

You are probably asking why I am bringing this up?. Well the fax coversheet attached to the subject Part 21 report includes the following text (bold type for emphasis):

NOTICE: The information contained in this email, and attachment(s), is **confidential** and may contain attorney any dissemination, distribution, or copying of this communication is strictly prohibited.

If you have received this communication in error, please notify the sender immediately and delete the email fro

I recognize that this is probably just "boilerplate" verbiage that accompanies all of your fax transmittals, but believe it or not, in the past when we have made that assumption and posted reports "as-is" we have been informed by those that monitor our public website that we were spilling confidential and or proprietary material. So to prevent any confusion, I need to check with you in order to verify that your recent Part 21 report does not contain confidential AZZ information. Upon your confirmation (an email reply is ok), we will strike out the subject paragraph and publish this document to the NRC website. If this report does contain proprietary and confidential information, then please submit the necessary information as described in 10 CFR 2.390.

Thank you for your time,

Steve Pannier
