

## UNITED STATES **NUCLEAR REGULATORY COMMISSION** WASHINGTON, D. C. 20555

FEB 13 1980

DOCKET NOS. 50-416 and 50-417

Mississippi Power & Light Company Attn: Mr. L. F. Dale Nuclear Project Manager P. O. Box 1640 Jackson, Mississippi 39205

## Gentleman:

We have received a copy of your request dated July 10, 1979, as supplemented by letter dated September 12, 1979, which you filed with the Office of Nuclear Reactor Regulation (ONRR) for review and approval. The request was for approval of deletion of the stage monitoring requirement contained in the Environmental Protection Program for the Grand Gulf Nuclear Station Units 1 and 2 (Construction Permits CPPR-118 and -119). Your request was not accompanied by approval/amendment fees as required by 10 CFR 170.22. Requests for approvals or amendments to construction permits, such as the one identified above, should be classified in the same manner as applications for operating license amendments in Section 170.22. Section 170.12(c) requires that your Company provide a proposed determination of the amendment (approval) class, state the basis therefor, and remit the fees with your application.

Based on guidance from the ONRR staff as a result of a preliminary review of your request, it has been determined that a Class II fee of \$1,200 is applicable for Unit 1 because the review involved is considered to be administrative in nature, and a Class I duplicate fee of \$400 is required for Unit 2. It is requested that your Company promptly remit a total of \$1,600 to this office. If the final review of your request by the ONRR staff reveals that these fees are incorrect, your Company will be refunded any overpayment or asked to pay for any additional amount due. All fees are payable to the U.S. Nuclear Regulatory Commission by check, draft, or money order.

Sincerely,

Reba M. Diggs
