SUBJ: Undetectable Failure in
Engineered Safety Features
Actuation System

Mr. Boyce Grier
Director, Region I
U.S. Nuclear Regulatory Commission
631 Park Avenue
King of Prussia, Pennsylvania 19406

Docket Nos.: STN 50-482, STN 50-483, STN 50-485, STN 50-486

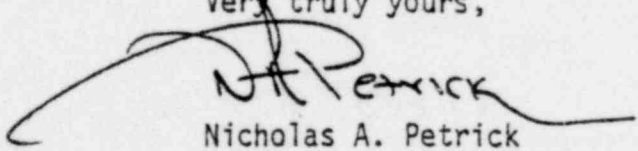

Ref: Westinghouse letter (T. M. Anderson), NS-TMA-2150, to USNRC
(V. Stello, Jr.), dated November 7, 1979, Same subject

Dear Mr. Grier:

On November 7, 1979, SNUPPS informed the Nuclear Regulatory Commission, Region I Office of Inspection and Enforcement, of a potential deficiency involving the Engineered Safety Features Actuation System. The information was communicated by telephone to Mr. Tripp of your staff pursuant to 10 CFR 50.55(e).

The referenced letter provided detailed information on the deficiency and recommended corrective action. The corrective action applicable to the SNUPPS plants is a test sequence that will detect the failure in question. This test sequence will be incorporated in the appropriate procedures for the SNUPPS plants.

Very truly yours,

Nicholas A. Petrick
