Serial No. 259/031080
LQA/WRM:rab

Docket Nos. 50-338
50-339

Dear Mr. Denton:

AUXILIARY FEEDWATER SYSTEM RELIABILITY
NORTH ANNA UNIT 2

We have received your letter of March 10, 1980 regarding a generic request for information on auxiliary feedwater systems for all pending operating license applicants.

By our letter dated February 26, 1980 (Serial No. 151), we referenced our previous responses to NRC letters dated September 28, 1979 and December 14, 1979 concerning auxiliary feedwater system requirements for North Anna Unit 1. As noted in our letter of November 2, 1979 (Serial No. 825/092879), we are taking action in response to the Staff's recommendations contained in the NRC reliability study of auxiliary feedwater systems at North Anna. In addition, our November 2, 1979 letter noted that actions being taken will also be performed on Unit 2.

Accordingly, the information you requested can be found in our previous responses referenced above.

Very truly yours,

C. M. Stallings

C. M. Stallings
Vice President-Power Supply
and Production Operations

cc: Mr. O. D. Parr, Chief
Division of Project Management
