

400 Chestnut Street Tower II

April 9, 1980

Director of Nuclear Reactor Regulation
Attention: Mr. L. S. Rubenstein, Acting Chief
Light Water Reactors Branch No. 4
Division of Project Management
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Rubenstein:

In the Matter of the Application of) Docket No. 50-327
Tennessee Valley Authority)

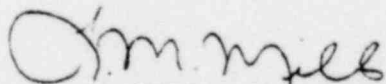

Enclosed for your review are ten copies of a lead or master document for the Sequoyah Nuclear Plant unit 1 special low power test program as requested on page I.G-5 of Supplement No. 1 to the Sequoyah Safety Evaluation Report, NUREG-0011. As revisions are made to the enclosure, change pages by section and page number will be provided as amendments.

This document contains the safety evaluation and the final test procedures which were sent to you by my letter dated March 27, 1980. In addition, the document provides the test schedule, SQNP SU-7.1, and the administrative procedures, SQA 109. SQA 109 is the standard practice which establishes the special low power test program and defines the organizational responsibilities, the documentation requirements, and the test restraints.

If you have any questions, please get in touch with M. J. Burzynski at FTS 854-2581.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills, Manager
Nuclear Regulation and Safety
