Reference: 50-424; 50-425; Embed Plate Assemblies - Significant Deficiency Report

Gentlemen:

On March 7, 1980 it was reported to your office that certain discrepancies existed in the significant deficiency report transmitted with our November 21, 1979 letter (Log GM-527). The major discrepancy in the report related to the status of the corrective action, i.e., contrary to the report, all corrective action had not been completed as of the report date.

Georgia Power Company is evaluating these discrepancies and a final report will be filed by May 30, 1980.

This response contains no proprietary information and may be placed in the NRC Public Document Rooms upon receipt.

Very truly yours,

Doug Dutton
Project General Manager
