DOCKET 50-255 - LICENSE-DPR 20-  
PALISADES PLANT - LICENSEE EVENT  
REPORT 80-004 - CTS HEADER ISOLATION

On the reverse side is Licensee Event Report 80-004 which is reportable under Technical Specification 6.9.2.A.2.

The investigation which led to discovery of the conditions reported by the attached LER was prompted by the combined findings of an in-company audit and IE Inspection 79-20. The investigation included a review of all Technical Specification surveillance procedures to determine if they satisfied the requirements of the Technical Specification and other basis documents. Of the 100 (plus) procedures reviewed, the discrepancy reported in the attached LER was one of the two LER's which were reportable.

David P Hoffman (Signed)
