(3) Letter, G. E. Cunningham to D. C. Dianni, 10/18/79

Dear Mr. Dianni:

In response to your questions concerning the response of the General Electric Nuclear Test Reactor (NTR) to a postulated seismic event at the Vallecitos Nuclear Center (VNC) General Electric is formally submitting three notarized and forty additional copies of a request to amend the Technical Specifications for License R-33. These amendments are identical to those we agreed on in our telephone conversations of 3/20/80 and 3/21/80.

As this submittal is part of an on-going licensing action (Ref. 2), no amendment fee is enclosed.

Sincerely,

G. E. Cunningham  
Sr. Licensing Engineer
