Washington, D. C. 20555

Dear Sir:

We have enclosed for your information five (5) copies of a report by Teknekron Energy Resource Analysts (TERA) Corporation, entitled Pebble Springs Seismic Network Annual Report November 1977-October 1978, dated January 1979. This annual report is a presentation of seismic data recorded by the Pebble Springs Seismic Network Monitoring Program for the period November 1977-October 1978, and includes comparative information from the previous report periods of November 1976-October 1977 and November 1975-October 1976. The Pebble Springs Seismic Network Monitoring Program is intended to provide continuous baseline data on seismicity of the site area for confirmatory and determinative purposes. This third annual report is being provided at this time because sufficient data has accumulated to meaningfully augment existing information about the seismicity of the Pebble Springs site. We hope that this information will be useful to you.

Sincerely,

W. J. Lindblad  
Vice President
