Gentlemen:

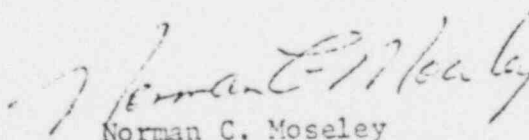

Thank you for your letter of April 1, 1975, informing us of steps you have taken to correct the items of noncompliance concerning activities under NRC Operating License Nos. DPR-38, DPA 47 and DPR-55 which were brought to your attention in our letter of March 10, 1975. We will examine your corrective actions and plans during subsequent inspections.

We have reviewed your comments concerning Unresolved Item 74-13/2, "Reactor Coolant Flow Anomaly," and will review the safety evaluation referred to in your letter to determine if this item can be closed. Information contained in AO-287/74-7, October 22, 1974, and supplemental information letter dated November 26, 1974, is insufficient in itself to close out this item.

Should you have any questions concerning this letter, you may communicate directly with this office.

We appreciate your cooperation with us.

Very truly yours,

Norman C. Moseley
Director
