

ENVIRONMENTAL LICENSEE EVENT REPORT (77-51E)

1. Facility: Crystal River Unit #3
2. Report Date: 13 June 1977
3. Occurrence Date: 9 May 1977
4. Identification of Occurrence:

The sampling effort for the marsh grass metabolism (productivity and respiration) studies was not completed within the first quarter sampling deadline.

5. Description of Occurrence:

The first quarter sampling deadline for CR #3 ETS nonradiological surveillance quarterly sampling was May 9, 1977. The contractor (University of Florida) who is conducting the marsh metabolism phase of the ETS studies over-ran this deadline by three days (sampling was completed on May 12, 1977).

6. Designation of Apparent Cause of Occurrence:

Inability of the contractor to obtain certain components prior to 9 May 1977 for the sampling instrumentation was the cause of the delay.

7. Corrective Action to Preclude Recurrence:

Inasmuch as parts are now installed, recurrence is not anticipated.
