Gentlemen:

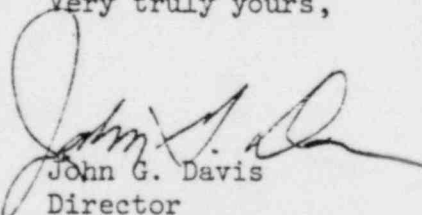

This refers to the inspection conducted by Messrs. Warnick and Beratan of the Division of Compliance on December 20-21, 1971, of activities authorized by AEC Construction Permit No. CPPR-51 for the Crystal River 3 facility, and to the discussion held with Mr. E. E. Froats of your staff during the inspection.

The area examined during this inspection was the grouting program described by you at the time the construction permit was issued. Within this area, the inspection consisted of selective examinations of the Foundation Engineering Report prepared jointly by Gilbert Associates, Inc., and Woodward-Clyde and Associates, interviews with plant personnel, and observations by the inspectors.

Within the scope of this inspection, no items of nonconformance were identified.

Should you have any questions concerning this letter, we will be glad to discuss them with you.

Very truly yours,

John G. Davis
Director
