POOR ORIGINAL

MAY 2 1972

Richard C. DeYoung, Assistant Director for PWR's Division of Reactor Licensing

FLORIDA POWER CORPORATION, CRYSTAL RIVER NUCLEAR GENERATING PLANT, UNIT 3, DOCKET NO. 50-302

The information submitted by the applicant in the FSAR and in Amendment No. 17, in response to our request for additional information, has been reviewed by the Materials Engineering Branch, DRS. No answers have been received for the DRL questions, Nos. 4.1, 4.2, 4.7, and 4.16, which were included in AEC's letter to the applicant dated January 17, 1972.

The applicant has indicated that he will provide this information by May 8, 1972. A revision of DRL question No. 4.1, to comply with the recently revised ASME B.&P.V. Code, Section III, fracture toughness requirements, is given in the attached enclosure. Adequate responses will be required by September 20, 1972, to enable us to complete our final operating license safety evaluation by the scheduled date of November 18, 1972.

R. R. Maccary, Assistant Director for Engineering Division of Reactor Standards
