Power**
CORPORATION

February 8, 1973

Mr. S. E. Kruesi, Director
The Directorate of Regulatory Operations
U.S. Atomic Energy Commission
Washington, D.C. 20545

Subject: Crystal River Plant - Unit #3
Docket No. 50-302

Dear Mr. Kruesi:

On January 5, 1973, Florida Power Corporation advised the DRO Region II office of our possible involvement in a situation which could be considered reportable under Federal Regulation 10 CFR50.55(e). This situation involved incomplete documentation in the weld filler material records for steam generators fabricated by the Babcock & Wilcox Company.

A report on the investigation of these records was submitted to the Atomic Energy Commission by B&W during a meeting on this subject in Bethesda, Maryland, on Tuesday, January 30, 1973. A copy of the report, BAW-1402, identifying our involvement will be maintained at the Crystal River Unit #3 site.

Please advise if further information on this matter is required.

Very truly yours,

FLORIDA POWER CORPORATION

Richard E. Raymond
Senior Vice President
