United States Atomic Energy Commission
Washington, DC 20545

SUBJECT: FLORIDA POWER CORPORATION
CRYSTAL RIVER NUCLEAR GENERATING PLANT
DOCKET NO. 50-302

Dear Mr. Schwencer:

This is to acknowledge Florida Power Corporation's commitment regarding a new meteorological data acquisition system for the Crystal River Unit 3 Nuclear Generating Plant site.

Florida Power Corporation is committed to install a new system that meets all requirements of Regulatory Guide 1.23. Activities are currently underway to procure and install the necessary equipment.

Measurements of wind direction, wind speed, and ambient temperature at both an upper and lower level and the differential temperature between levels will be taken with the required accuracies. In addition, this information will be displayed in the Crystal River Unit 3 control room, and will be recorded or logged to provide permanent records.

FSAR revisions will be made accordingly in the future to reflect those design changes when the design and equipment are finalized.

If any further discussions or explanations are required, please feel free to contact us.

Very truly yours,

J. T. Rodgers
J. T. Rodgers
Assistant Vice President
