REGULATORY OPERATIONS BULLETIN 72-3

Attached is a letter received from Sacramento Municipal Utility District containing additional information concerning their corrective action program for the Limitorque valve operator switch problem described in our subject bulletin. The letter is a followup to their initial letter of reply dated December 22, 1972.

As mentioned in our memo of January 19, 1973, we plan to follow SMUD's activities on this matter until corrective action has been completed.

A handwritten signature in cursive script, appearing to read "G. S. Spencer", is located above the typed name.

G. S. Spencer, Chief
Reactor Construction and
Operations Branch
