Boyce H. Grier, Director
United States Nuclear Regulatory Commission
Region I
631 Park Avenue
King of Prussia, PA. 19406

SUBJECT: NRC I&E BULLETIN NO. 79-01B
ENVIRONMENTAL QUALIFICATION OF CLASS 1E EQUIPMENT

Dear Mr. Grier:

The FitzPatrick Plant and its Architect-Engineer have completed and attach as enclosure 1, the requested responses to action items 1 through 3 of the subject bulletin.

This response contains a master list of the Class 1E electrical components of the engineered safety featured systems listed in the FSAR which are required to function under the postulated accident conditions given in the bulletin.

Due to the scope of work required and the relatively short response time, the qualification requirements or qualification status of a number of components identified in the master list, has not yet been completed. Accordingly, these items are identified as "Outstanding Items" and the information will be provided with the second phase of the response.

Very truly yours,

JOHN D. LEONARD, JR.
