Mr. Boyce H. Grier Director
United States Nuclear Regulatory Commission
Region I
631 Park Avenue
King of Prussia, PA 19406

SUBJECT: NRC I&E Bulletin 79-18
Audibility Problems in High Noise Areas

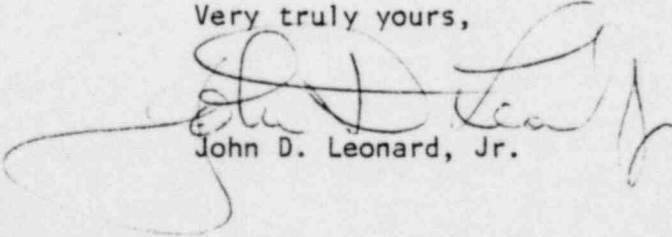

REFERENCE: Letter to NRC Dated October 17, 1979, (JAFP-79-566)
from John D. Leonard, Jr.

Dear Mr. Grier:

In the referenced response, it was stated that the corrective actions for accessible areas would be completed by February 15, 1980 (120 days from the date of the response). However, some of the material ordered from Gaitronics Corporation has not yet been received. The shipment is due this week. As soon as the equipment is received, the plant staff will complete the corrective actions. Therefore, an extension of the completion date to March 7, 1980 is requested.

As previously stated in the referenced letter, the areas which are considered inaccessible due to high radiation during plant operation, will be completed during the next refueling outage.

Very truly yours,

John D. Leonard, Jr.
