MAR 20 1980

Docket No. 50-346

Toledo Edison Company
ATTN: Mr. Richard P. Crouse
Vice President
Nuclear
Edison Plaza
300 Madison Avenue
Toledo, OH 43652

Gentlemen:

Attached to this letter is a copy of the operating instructions and characteristics of the Health Physics network. This telephone is colored red and has either a rotary dial or touch tone capability. It is connected to circuit No. GDA-2064 or GDA-2065. (The GPD circuit Nos. are the OPX dedicated lines.) The code for the Region III office is 23, while the code for Headquarters is 22. Also attached to this letter are stickers for your telephones which contain this information. You must first push the "star" button if you have a touch tone telephone, before you dial 23 or 22. Calls during normal business hours (7:00 a.m. - 4:30 p.m. Central Standard Time) should go to the regional office (23), while calls at other times should go to the Headquarters office, unless you are instructed otherwise. Please note especially, that you will not hear a dial tone when you initiate a call, nor will you hear a ringing after you dial a code. If your call is not answered in approximately one minute, please hang up and dial again.

The purpose of this telephone network is the transmission of health physics information during an incident or abnormal occurrence at your facility. It is also to be used for routine transmission of information requested by this region.
