VIRGINIA ELECTRIC AND POWER COMPANY
RICHMOND, VIRGINIA 23261

April 3, 1980
APR 7 AIO: 42

Mr. James P. O'Reilly, Director
Office of Inspection and Enforcement
U. S. Nuclear Regulatory Commission
Region II
101 Marietta Street, Suite 3100
Atlanta, Georgia 30303

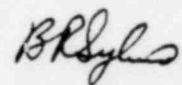

Serial No. 232/050780
PO/RMT:baw
Docket Nos. 50-338
50-339
License No. NPF-4
Permit No. CPPR-78

Dear Mr. O'Reilly:

We have reviewed your letter of March 7, 1980 in reference to the inspection conducted at North Anna Power Station Unit Nos. 1 and 2 and reported in IE Inspection Report Nos. 50-338/80-09 and 50-339/80-07. Our responses to the specific infractions are attached.

We have determined that no proprietary information is contained in the reports. Accordingly, the Virginia Electric and Power Company has no objection to these inspection reports being made a matter of public disclosure.

Very truly yours,

B. R. Sylvia
Manager-Nuclear Operations

Attachment

cc: Mr. Albert Schwencer

Response to Notice of Violation
Items Reported in IE Inspection Report
50-338/80-05 and 50-339/80-07

NRC Comment

- A. Technical Specification 6.8.1.e. requires that written procedures be implemented which cover, in part, emergency plan implementation. Appendix 8.5 of the Emergency Plan describes equipment to be maintained in Emergency Health Physics Kits. Procedure HP-ADM-EP-1 requires an inventory of three Emergency Health Physics Kits monthly (30 ± 3 days).

Contrary to the above, the three Emergency Health Physics Kits were not inventoried during the month of November 1979, within the prescribed time period.

This is a deficiency.

Response

The above deficiency is correct as stated. Specifically, pursuant to Section 2.201 of the NRC's "Rules of Practice" Part 2, title 10, Code of Federal Regulations, the following information is submitted:

1. Corrective Steps Taken and Results Achieved:

A periodic test was written and approved by the SNSOC to insure the Health Physics Kits are inventoried on a monthly basis. By making this inventory a periodic test the Performance Engineer will now verify its completion.

2. Corrective Steps Which Will be Taken to Avoid Further Non-Compliance:

We believe that the above listed corrective action will be sufficient.

3. Date When Full Compliance Will be Achieved:

Full compliance was achieved on 3/12/80.

Comment

- B. Technical Specification 6.2.2.f (Amendment 3, effective May 1, 1978) required at least five fire brigade members on site at all times, in addition to the minimum shift crew required for a safe, orderly shut-down of the plant.

Contrary to the above, the day shift on October 28, 1978, consisted of only four fire brigade members. This was previously identified as an unresolved item and is applicable to Unit 1.

This is an infraction.

Response

The above infraction is correct as stated. Specifically, pursuant to Section 2.201 of the NRC's "Rules of Practice" Part 2, title 10, Code of Federal Regulations, the following information is submitted:

1. Corrective Steps Taken and Results Achieved:

A Security general order has been written requiring the Security Shift Supervisor to verify at the beginning of each shift that 5 fire brigade members are present on site. This includes verification for one of these members to be a scene leader.

2. Corrective Steps Which Will be Taken to Avoid Further Non-Compliance:

We believe that the above listed corrective action will be sufficient.

3. Date When Full Compliance Will Be Achieved:

Full compliance was achieved on 4/1/80.
