Dear Sir:

We feel that the issue of a meltdown (a Class 9 Accident) should be explored fully in the hearings on Black Fox Nuclear Power Plants near Inola, Oklahoma. We request that the Environmental and Site Suitability Hearings be reopened to address this important issue.

Black Fox is very close to Tulsa and if a meltdown did occur it would definitely destroy Tulsa + much of all of the state. This is too important to be dismissed.

Thank you.

Sincerely,

Don + Donna Plant
