U. S. Nuclear Regulatory Commission
 Att: Charles Trammell
 Washington, D. C. 20555

Re: Point Beach Nuclear Plant
 Dockets 50-266 and 50-301

Dear Mr. Trammell:

This letter is to formally request the establishment of an NRC document room for Wisconsin nuclear reactors in Madison, Wisconsin.

A document room is necessary in Madison, Wisconsin, especially for material related to the Point Beach Nuclear Plant, because of the extremely significant decisions affecting the plant presently being made by State Government. The existing document room in Stevens Point, which is not open either evenings or weekends and which is a three hour drive from Madison, is completely inadequate.

Madison is an appropriate site for an additional document room because it is the location of the Public Service Commission, the State Legislature and numerous citizen organizations deeply concerned with the issue.

We have contacted the Kurt F. Wendt Library, College of Engineering, University of Wisconsin-Madison, and they have indicated a willingness to accept a document room for Wisconsin plants.

It should be clear, at the same time, that we are not seeking the removal of the existing document rooms from their present locations, but rather the establishment of a new document room in the state capitol.

Sincerely,
 WISCONSIN'S ENVIRONMENTAL DECADE, INC.

by 
 PETER ANDERSON
 Public Affairs Officer
