RE: Davis-Besse N.P.S.,  
Docket No. 50-346

Dr. Harold Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
1717 H Street, N.W.  
Washington, D.C. 20555

Dear Dr. Denton:

On March 25, 1980. I wrote to you requesting detailed information on an NRC show-cause order of about March 6 to the Toledo Edison Company as to why it should not upgrade the staffing at Davis-Besse to the levels required by its operating license, or alternatively why Davis-Besse should not be shut down immediately.

I have not as yet received any reply from you. I am therefore renewing my request for a copy of that NRC order, together with any supporting documentation such as NRC staff inspection reports..

You are aware by our past correspondence that my clients, the Coalition, consist of many citizens of northwest Ohio who are concerned about managerial and operational deficiencies at Davis-Besse. We would appreciate your forwarding copies of any responsive correspondence of Toledo Edison Company which might allay some of the public fears about continued mishandling of plant management..

Your expeditious reply would be appreciated. Thank you.

Very truly yours,

*Terry J. Lodge*
