Re: Pacific Gas & Electric Co., Stanislaus Nuclear Project,
Unit No. 1, NRC Docket No. P-564A

Dear Rich:

I am attaching a complete list of the files designated by the Department of Water Resources and the staff of the Nuclear Regulatory Commission which we wish produced from the PG&E warehouse. I have spoken with the NRC staff and with representatives of the other intervenors and we are all in agreement that production of documents from the warehouse should follow immediately upon your completion of production from the siting department. I understand from Jack Goldberg that you will complete the siting department production in the first week of June.

I would like to take this opportunity to thank you for your cooperation and that of your staff in going through the PG&E warehouse designation. In particular, I think the staff at the Brisbane warehouse deserve special thanks for their cooperation and assistance to Chris Neal and Noel Cook during the two weeks they spent designating documents at the warehouse. At all times, the warehouse staff extended every courtesy and assistance to Ms. Neal and Mr. Cook, and I greatly appreciate that effort.
