

UNITED STATES GOVERNMENT

Memorandum

Karas
Steele

TO : Roger S. Boyd, Assistant Director
for Reactor Projects, DRL

DATE: March 9, 1967

FROM : *Lovejoy*
Charles A. Lovejoy
Office of the Controller

SUBJECT: DUKE POWER COMPANY - DOCKET NOS. 50-269 AND 50-270

As requested in your recent memorandum, the following is the additional information I will need to adequately analyze the applicant's financial qualifications:

1. The 1966 Annual Report
2. The total estimated costs of \$197,828,000 (on page 7 of the application) should be segregated as to the costs of the initial cores and the costs to design and to construct both facilities, broken down to identify clearly costs covered under contracts, other direct costs for facilities and services, including provisions for contingencies and escalation, and applicable indirect costs for administrative and legal expenses and for interest, insurance and the like which will be prorated to the project.
3. The quantity, enrichments and dollar value of the uranium contained in the first core fuel.
4. Estimated fund requirements for the total construction program through 1971 and the amount that each source will provide for each year.
