Chairman, U.S. NRC  
Washington, D.C. 20555

Dear Sir,

I am writing to ask that the N.R.C. please allow C.A.S.E. to address the issue of a melt down in the hearings affecting the building and operation of the Black Fox plant. I feel that you are overlooking very important questions that need to be answered fully before an accident occurs. Everything should be researched fully. If there is nothing to hide then why deny the citizens of Okla. their chance to speak and answer their questions?
