MEMORANDUM FOR: Dr. L.M. Shotkin, Analysis Development Branch, RES

FROM: R.F. Audette, Systems Analysis Section, Analysis Branch, DSS

SUBJECT: LOFT AND SEMISCALE PRE-TEST CALCULATIONS AT SRL

Mr. R. Landry of the LOFT Program Office in RES has informed us that the L2-5 test has been re-scheduled to September, 1981, and could be run with slightly different initial conditions than would exist if run as originally scheduled. As a result, we are requesting that the planned pre-test EM calculation of this test at SRL be delayed to about June/July 1981 when test conditions are expected to be more fully defined.

Based on the information which you provided recently by phone concerning the re-running of Semiscale Test S-07-10B, we concur in the plan to continue the scheduled EM calculation at SRL so that the results can serve as a pre-test prediction for the currently planned test in May, 1980.
