Subject: Revised staff hours estimate - FitzPatrick License Amendment Request on Proposed Changes to the Technical Specifications Related to Primary Containment Hydrodynamic Loads (EPID: L-2019-LLA-0197)

Mr. Williams,

By letter dated September 12, 2019 (ADAMS Accession No. ML19220A043), Exelon submitted the subject request for FitzPatrick. By email dated October 18, 2019, the staff accepted the subject request for review and provided an estimate of 750 hours (ADAMS Accession No. ML19291B330). However, some technical disciplines were missing in that staff hours estimate. The purpose of this e-mail is to provide the revised staff estimate. The NRC staff is expected to spend 950 hours to complete the review.

If you have any questions, please contact me.

Samson Lee
FitzPatrick Project Manager
Plant Licensing Branch I
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation
