Dear Sir:

South Texas Project
Units 1 & 2
Final Report on the Safety
Injection System Piping Deficiency

On October 25, 1979, pursuant to 10 CFR 50.55(e), Houston Lighting and Power Company notified your office of a deficiency in the Safety Injection System containment emergency sump piping design. The Interim Report of March 19, 1980, indicated that if the second design alternative (i.e. anchoring the process pipe to the guard pipe) was found to be acceptable, a final report would be submitted by May 30, 1980. In response to that commitment, attached is the final report.

Questions concerning this matter should be directed to Mr. Shawn Rodgers at (713) 676-7953.

Very truly yours,

E. A. Turner
Vice President
Power Plant Construction
