

UNITED STATES GOVERNMENT

Memorandum

TO : Those Listed Below

DATE: DEC 17 1965

FROM : Clifford K. Beck
Deputy Director of Regulation

SUBJECT: REQUEST FOR DISCUSSIONS BY DUKE POWER COMPANY
RE PARR REACTOR PROJECT

On December 15th, Mr. Fiss of Duke Power Company called to request an appointment for himself, O.G. Miller, Ray Talton and Harold Babb of the four principal companies involved in the Parr reactor project, respectively, with members of the Regulatory Staff and, if appropriate, representatives of the Steering Committee on Reactor Safety, to discuss the types of engineering safeguard studies which might profitably be carried out by industry, in cooperation with the AEC, and in particular what studies of this type might be appropriate for the Parr, South Carolina, plant.

The writer has tentatively agreed to meet with Mr. Fiss and his associates on January 27th, at the Bethesda Office, and will contact the Steering Committee in advance of that date to explore appropriate representation at this meeting.
