Gentlemen:

SUBJECT: ISSUANCE OF AMENDMENT NO. 1 TO FACILITY OPERATING LICENSE
NO. NPF-3 FOR DAVIS-BESSE NUCLEAR POWER STATION, UNIT NO. 1

The Nuclear Regulatory Commission has issued the enclosed Amendment No. 1 to Facility Operating License No. NPF-3 which is effective as of the date of issuance. Amendment No. 1 revises the Technical Specifications, Appendix A to the Facility Operating License to allow decay heat removal train pump switching operations for the purpose of testing in facility operational Modes 3, 4 and 5. The license is amended by making the appropriate changes to Specification 3.4.1 on page 3/4 4-2 of Appendix A to the license.

We have determined that Amendment No. 1 does not authorize a change in effluent types or total amounts nor an increase in power level and will not result in any significant environmental impact. Having made this determination, we have further concluded that the amendment involves an action which is insignificant from the standpoint of environmental impact and, pursuant to 10 CFR Section 51.5(d)(4), that an environmental impact appraisal need not be prepared in connection with the issuance of this amendment.
