REGULATORY DOCKET FILE COPY

LOWELL E. ROE
Vice President, Power
(419) 259-5242

June 17, 1974

Docket 50-346

Mr. A. Giambusso, Deputy Director for Reactor Projects
Directorate of Licensing
Office of Regulation
United States Atomic Energy Commission
Washington, D.C. 20545

Dear Mr. Giambusso:

Under separate cover, we are transmitting Amendment No. 20 to the Application for Licenses for the Davis-Besse Nuclear Power Station Unit No. 1. This Amendment consists of Revision No. 6 to the Final Safety Analysis Report (FSAR). Three (3) original and twenty-five (25) conformed copies of the transmittal sheet are included together with seventy (70) copies of Revision 6 to the FSAR.

This revision to the FSAR contains additional answers to questions transmitted by the Directorate of Licensing on August 28, 1973 and December 26, 1973, as well as insert changes to Volumes 1 thru 8 of the FSAR reflecting text revisions interfacing with responses to questions, and including miscellaneous text changes. Volume 9 of the FSAR is being issued to allow for expansions resulting from this revision.

Question 9.2.8 will be responded to before the July 5, 1974, date referenced in your letter of November 23, 1973. Questions 4.4.2 and 15.2.9 require further response which will be submitted in accordance with the Babcock and Wilcox generic fuel densification evaluation program. Question 6.2.12 requires information currently unavailable from the component vendor; our response will be submitted upon receipt of that information.

The information submitted thru this FSAR revision is hoped to allow the continuation of the operating license application review in accordance with your schedule of November 23, 1973.

Yours very truly,

nh dd/2
