

January 11, 1978

Docket No.: 50-302

Florida Power Corporation
ATTN: Mr. W. P. Stewart, Director
Power Production
P. O. Box 14042, Mail Stop C-4
St. Petersburg, Florida 33733

Gentlemen:

The Commission has issued the enclosed Amendment No. 11 to Facility Operating License No. DPR-72 for the Crystal River Unit No. 3 Nuclear Generating Plant. The amendment consists of changes to the Technical Specifications in response to your application dated July 15, 1977.

This amendment resolves conflicting requirements with respect to the Reactor Building Purge Exhaust Duct Monitor trip setpoints, amplifies an emergency feedwater pump surveillance requirement, corrects typographical errors and deletes improperly characterized valves from a table of containment isolation valves. Those portions of your proposal dealing with deletion of sodium thiosulfate tank requirements and changes to Section 6 of your Technical Specifications are being handled separately.

Changes to your proposal were necessary to meet our requirements. These have been discussed with and agreed to by your staff.

Copies of the Safety Evaluation and Notice of Issuance are also enclosed.

Sincerely,

Robert W. Reid, Chief
Operating Reactors Branch #4
Division of Operating Reactors
