Gentlemen:

Recently the Babcock & Wilcox Company (B&W) revised or supplemented several existing B&W topical reports and prepared several new ones. From our safety review activities it appears that your application should be revised to include some of this new information. To assure ourselves that all appropriate B&W topical reports, revisions and supplements necessary to support your application for an operating license for Crystal River Unit 3 Nuclear Generating Plant have been included in your application, you are requested to furnish a current compilation of all applicable B&W topical reports. If this compilation includes any B&W topical reports which are not now a part of your application, you are requested to take appropriate action to amend your application to incorporate them.

Your reply by July 3, 1972 will aid in expediting our continuing review of your application. Please inform us within seven (7) days after receipt of this letter as to the date when you will be able to submit the requested information.

Please contact us if you desire any discussion or clarification of the material requested.

Sincerely,

Original signed by
 R. C. DeYoung

R. C. DeYoung, Assistant Director
 for Pressurized Water Reactors
 Directorate of Licensing
