Director of Nuclear Reactor Regulation Attention: Mr. Robert W. Reid, Chief Operating Reactors, Branch 4 U. S. Nuclear Regulatory Commission Washington, D. C. 20555

> Docket No. 50-312 Rancho Seco Nuclear Generating Station, Unit No. 1

Dear Mr. Reid:

Please refer to your letter of September 21, 1976 which requested that we submit a proposed Technical Specification change relative to inspection of our steam generators by November 8, 1976.

As you are aware, we have been working on a number of proposed Technical Specification changes and responses to several NRC letters and we find it impossible to complete this proposed Technical Specification by this date. We have discussed this with Dr. Rooney of your staff and based on these discussions are requesting that the due date on this submittal be delayed until December 1, 1976. We will assume that this delay is acceptable to you unless we hear from you to the contrary.

Sincerely yours,

Assistant General Manager

and Chief Engineer
