Florida Power
CORPORATION

June 19, 1980

Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Crystal River Unit No. 3
Docket No. 50-302
Operating License DPR-72
Five Additional TMI-2 Related Requirements
to Operating Reactors

Dear Sir:

Darrell G. Eisenhut requested all operating reactor licensees to reply
within 30 days of receipt of the May 7, 1980, letter on five additional
TMI-2 related requirements. Florida Power Corporation will attempt to
meet the commitment items in an expeditious manner.

Florida Power Corporation has not received Item 1 of your May 7, 1980
letter "I.A.1.3 - Shift Manning" yet. Most of the remaining requests
require a considerable technical review in order to understand the
implications and effects on safety items. Other requests require the
development of new systems which may not be commercially available. The
B&W Owners Group is meeting during the later part of June to discuss
what has to be done to accomplish these requests and the time frame re-
quired. After this meeting, we will further develop our internal plans.

Florida Power Corporation requests an extension to July 21, 1980 to com-
mit to these requirements and schedule their implementation.
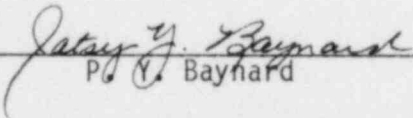

Sincerely,

FLORIDA POWER CORPORATION

P. Y. Baynard
Manager
Nuclear Support Services

Klein(R01)D1
