Docket Nos. 50-445
50-446

COMANCHE PEAK STEAM ELECTRIC STATION
1981-83 2300 MW INSTALLATION
PIPING MINIMUM WALL
FILE NO: 10110

Dear Mr. Seidle:

This progress report supplements our letters TXX-3088 and TXX-3123, dated January 14, and April 15, 1980, respectively, relative to a violation of piping minimum wall thickness previously reported to you in accordance with 10 CFR 50.55(e). TXX-3088 detailed our corrective actions and TXX-3123 provided an update of those activities.

The engineering review and disposition of the minimum wall violations at the welds and the base metal defects is continuing. As of this date, no additional systems have been closed. We anticipate submitting our next progress report to you by December 19, 1980.

Very truly yours,

R. J. Gary
