MARYLAND COMMISSION ON
 INTERGOVERNMENTAL COOPERATION

90 STATE CIRCLE, LEGISLATIVE SERVICES BUILDING
 ANNAPOLIS, MARYLAND 21401

April 28, 1980

Mr. Frank W. Young
 Acting Program Director for Program Development
 Office of State Programs
 Nuclear Regulatory Commission
 Washington, D. C. 20555

Attention: Elizabeth McCarthy

Dear Mr. Young:

1:00

As you know, the Maryland Commission on Intergovernmental Cooperation is currently examining the intergovernmental aspects of nuclear waste management and disposal. The Commission will hear testimony on this subject at 1:30 p.m. on June 3 and June 17, 1980, in the Joint Hearing Room of the Legislative Services Building in Annapolis. We would be pleased if you would testify before the Commission on certain elements of the problem of nuclear waste management.

4

The Commission is particularly interested in the intergovernmental aspects of low level/high level waste management and disposal. Enclosed are certain specific questions that the Commission would appreciate your addressing in your testimony.

The Commission is planning to invite federal, State and local government officials and representatives of intergovernmental organizations who have responsibility over nuclear waste management and disposal in the areas of licensing and regulation, transportation, emergency preparedness, program planning, and intergovernmental policy coordination.

On behalf of the Commission on Intergovernmental Cooperation I thank you in advance for your cooperation in this matter. If you have any question regarding the substantive questions that you have been asked to respond to or the hearing in general, please do not hesitate to contact me by calling 301-269-2465.

Sincerely yours,

James H. Easter

MARYLAND COMMISSION ON INTERGOVERNMENTAL COOPERATION

Questions addressed to: Mr. Frank W. Young
Acting Program Director for
Program Development
Office of State Programs
Nuclear Regulatory Commission

1. What is the status of spent fuel storage capacity at Calvert Cliffs Power Plant at Lusby, Maryland?
 2. What contingency plans are being developed in view of limited spent fuel storage capacity beyond 1987?
- * The Commission would appreciate your providing a spokesperson with thorough knowledge of Calvert Cliffs Power Plant.

It would be helpful if you could provide us with a written response to these questions in advance of the hearing date so that we can distribute them to the members of the Commission and other interested parties.
