50-278

IE Bulletin 79-14

Mr. Boyce H. Grier, Director
Office of Inspection & Enforcement
Region I
US Nuclear Regulatory Commission
631 Park Avenue
King of Prussia, PA 19406

Reference: Letter from B. H. Grier to S. L. Daltroff
dated October 24, 1979

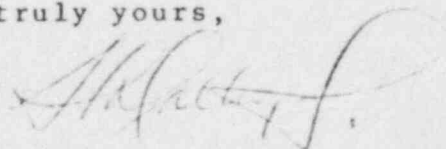

Dear Mr. Grier:

The referenced letter itemizes certain actions to be completed by Philadelphia Electric Company (PECO). Item B.4 concerns Bulletin 79-14 which pertains to seismic analyses for as-built safety-related piping systems and states that PECO is to "submit a final report within 30 days of completion of the Unit 2 effort or by June 15, 1980, whichever occurs first."

Bechtel Power Corporation is performing the engineering review and analyses for the as-built safety-related piping at Peach Bottom Units 2 and 3. Unit 3 is in operation and a final report of the review will be submitted by June 15, 1980. Due to the large scope of the project, the Unit 2 review will not be completed by June 15, 1980. Unit 2 is currently in a refueling outage that is scheduled for completion by the end of July. A final report for Unit 2 will be submitted prior to the unit startup.

If you have any questions or require any additional information, do not hesitate to contact us.

Very truly yours,
