MEMORANDUM FOR: P. S. Check, Chief, Reactor Safety Branch, Division of Operating Reactors, NRR

FROM: E. L. Jordan, Assistant Director for Technical Programs,
Division of Reactor Operations Inspection, IE

SUBJECT: REVIEW OF DAVIS-BESSE FUEL WITH LESS THAN EXPECTED LINEAR
HEAT RATE CAPABILITY (AITS F30498H2)

The enclosed memoranda are forwarded per our telecon of May 31, 1979 for NRR review. The specific concerns are whether the information in BWT-1467 "Davis-Besse Unit 1 Selective Fuel Loading," dated February 2, 1977 affects NRR analyses regarding condition I and II events, especially the dropped rod accident. Since all of the issues and concerns may not be clearly defined, I and the Region III representatives will be glad to meet with you and members of your staff to clarify the concerns.

Edward L. Jordan, Assistant Director
for Technical Programs
Division of Reactor Operations Inspection

Enclosure: Memo J. F. Streeter, RIII to
E. L. Jordan dated 4/24/79

cc: N. C. Moseley, IE
M. Chatterton, NRR
R. F. Heishman, RIII
J. F. Streeter, RIII
S. E. Bryan, IE
