FEB 2 8 1973

Docket No. 50-270

A. Giambusso, Deputy Director for Reactor Projects, L

EXTENSION OF CONSTRUCTION COMPLETION DATE FOR THE OCONEE NUCLEAR STATION, UNIT NO. 2, DOCKET NO. 50-270

On January 25, 1973, the Duke Power Company requested an extension of the completion date because construction of Unit 2 has been delayed due to (i) diversion of construction forces from Unit 2 to Unit 1 to solve problems occasioned by the lateness of Unit 1, (ii) delay in delivery of major reactor coolant components, and (iii) modifications required to the reactor vessel internals for Unit 2.

Having reviewed the applicant's submission in support of this request, the Regulatory staff finds that prior public notice of an order authorizing the requested extension is not required since the action does not involve significant hazards consideration and that good cause exists for the issuance of an order extending the completion date.

Accordingly, issuance of an order extending the completion date for the construction of the Oconee Nuclear Station, Unit 2, as presently set forth in Construction Permit No. CPPR-34 to September 1, 1973 should be authorized. The order is to be effective on the date of issuance.

Docket No. 50-270

A. Giambusso, Deputy Director for Reactor Projects, L

EXTENSION OF CONSTRUCTION COMPLETION DATE FOR THE OCONEE NUCLEAR STATION, UNIT NO. 2, DOCKET NO. 50-270

On January 25, 1973, the Duke Power Company requested an extension of the completion date for the construction of the Oconee Nuclear Station, Unit 2, on the grounds that problem related delays in Unit 1 caused delays in Unit 2. In particular Unit 2 vessel internals required modification and construction forces were diverted from Unit 2 to Unit 1 to solve Unit 1 problems.

Having reviewed the applicant's submission in support of this request, the Regulatory staff finds that prior public notice of an order authorizing the requested extension is not required since the action does not involve significant hazards consideration and that good cause exists for the issuance of an order extending the completion date.

Accordingly, issuance of an order extending the completion date for the construction of the Oconee Nuclear Station, Unit 2, as presently set forth in Construction Permit No. CPPR-34 to September 1, 1973 ~~is~~ should be authorized. The order is to be effective on the date of issuance.
