RADIOLOGICAL ASSESSMENT BRANCH REVIEW OF
RADIOLOGICAL (APPENDIX A) TECHNICAL SPECIFICATIONS
FOR DAVIS BESSE

- (1) Reporting requirements of interest to RAB include items a(2)(e) and a(3)(g) of Regulatory Guide 1.16, "Report of Operating Information". A generic statement such as that given below would be satisfactory:

"Operating information shall be reported in the form and at frequencies specified in USAEC Regulatory Guide No. 1.16 entitled, 'Reporting of Operating Information' dated October 1973."

- (2) A section entitled, "Miscellaneous Radioactive Materials Source" (see Attachment A) should be inserted in Davis Besse Tech Specs. (This section can have sub-headings such as "Radioactive Source Leakage Test" or "Sealed Source Contamination").
- (3) Section 6.7 "Radiation and Respirator Protection Program" is incomplete since the explanation of notes referred to in Table 6.7-1 is missing. A copy of the explanation of these notes is shown in attachment B.
