Docket No. 50-346

Tom Novak, Chief, Reactor Systems Branch, TR, Licensing
DAVIS-BASSE 1 REVIEW

CRSB

This is to confirm my understanding per our telecon of November 7, 1974 regarding the balance of RSB review on Davis-Besse 1.

- 2/03/75 - RSB will complete its round-2 review and provide LPM with any requests or positions developed. (This excludes ECCS-LOCA per FAC).*
- 2/14/75 - LPM will send round-2's to applicant.
- 3/14/75 - Applicant will respond to round-2's.
- 4/25/75 - Applicant will make final submittal of ECCS-LOCA report to staff (Hopefully in good shape based on generic effort of B&W).**
- 5/30/75 - RSB will provide LPM with SE input (including ECCS-LOCA).*

* ECCS-LOCA review will proceed generically through DB analysis in time period Jan. 1, 1975 to March 31, 1975.

** Applicant will be encouraged to submit report earlier if feasible.

Original Signed by

I. A. Peltier, Project Manager
Light Water Reactors Branch 2-3
Directorate of Licensing
