Mr. Leonard Murphy, Chief
Seismology Division
U. S. Coast & Geodetic Survey
ESSA - Washington Science Center
Rockville, Maryland 20852

Dear Mr. Murphy:

In accordance with the understandings which were reflected in Chairman Seaborg's letter of October 3, 1963 to Admiral Kero, I am forwarding Volumes 1, 2 and 3 of the Preliminary Safety Analysis Report filed by The Toledo Edison Company and The Cleveland Electric Illuminating Company with their application for authorization to construct and operate the Davis-Besse Nuclear Power Station.

The proposed facility is to be located on the applicants' approximately 900-acre site on the southwest shore of Lake Erie, about twenty-one miles east of Toledo, in Ottawa County, Ohio.

We would appreciate receiving the results of your review of the enclosed documents concerning the seismological characteristics of the Davis-Besse Station site which might have a bearing upon our safety review of the Davis-Besse Nuclear Power Station Unit No. 1.

Your prompt review and comments will be appreciated.

Reimbursement for services rendered in this connection should be charged to Order No. WA-6936-69.

Sincerely yours,

Original signed by:
Roger S. Boyd

Roger S. Boyd, Assistant Director
for Reactor Projects
Division of Reactor Licensing
