John Kearne  
Chairman U.S. N.R.C.  
Washington, D.C. 20555

Dear Sir:

As to the venting of Three Mile Island's  
Krypton gas, would it not be possible;  
since it is Krypton gas to vent it into  
a helium balloon or balloons. This  
would allow the gas to rise into  
the stratosphere where the balloon would  
eventually rupture; but by this time  
the particles would be so high, admitting  
little if any damage.

Sincerely,  
Meyer R. Sonneborn, D.O.
