Regarding: Draft Regulatory Guide and Value/Impact Statement
Instruction Concerning Risk From Occupational
Radiation Exposure

Dear Sir:

After having written many letters in the past criticizing some of the material that has come out of the AEC or the NRC, this time I wish to congratulate you on the fine instructional sheets that you have written. We shall find these to be very helpful in trying to explain, not only to our Radiation workers but to the nursing personnel regarding the risks of radiation. The Table 2--Estimated Loss of Life Expectancy from Health Risks is especially valuable in trying to relate radiation risks to other necessary things in life.

Thanks again for such a fine job.

Sincerely,

Robert D. Berkebile
Robert D. Berkebile, M.D.
