Light Water Reactors  
Branch No. 2  
Division of Project Management  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

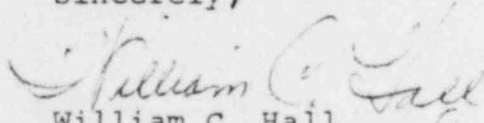

Re: Topical Report, PPI-TR-7701, Rev. 1  
Radwaste Solidification System  
Description and Operation

Gentlemen:

On December 28, 1979, my letter PPI-WCH-203 forwarded the referenced report for review. Subsequently, during a telephoned follow-up on January 18, 1980, I informed Mr. Robert Benedict that this system had been sold to South Carolina Electric and Gas Company for use in the V. C. Summer Power Station, which is presently under license review, and also to Central Nuclear de Almaraz, Units 1 and 2.

Both these users have been inquiring as to the status of the report. The purpose of this letter, then, is to draw the attention of the Commission to the linkage between the delivered systems as described in the report, and the projected operation of the two power stations. We are aware of the manpower commitments of the NRC to other urgent matters, but request that the submittal be reviewed as soon as possible. We look forward to hearing from you.

Sincerely,

  
William C. Hall  
Marketing Manager
