Dear Mike:

As we discussed on the telephone today, I have enclosed a graph of the market price of GPU common stock from January 1979 through mid-June 1980. The points plotted on the graph are the closing prices at the middle and at the end of each month of the period. For your background file, I have also enclosed tables that show the daily GPU stock prices and volumes traded over this same period. It is interesting to note the large volume of trading in early April 1979 (after the accident) and again in early February 1980 when GPU eliminated its common stock dividend.

Please call me if you need any additional materials.

Very truly yours,

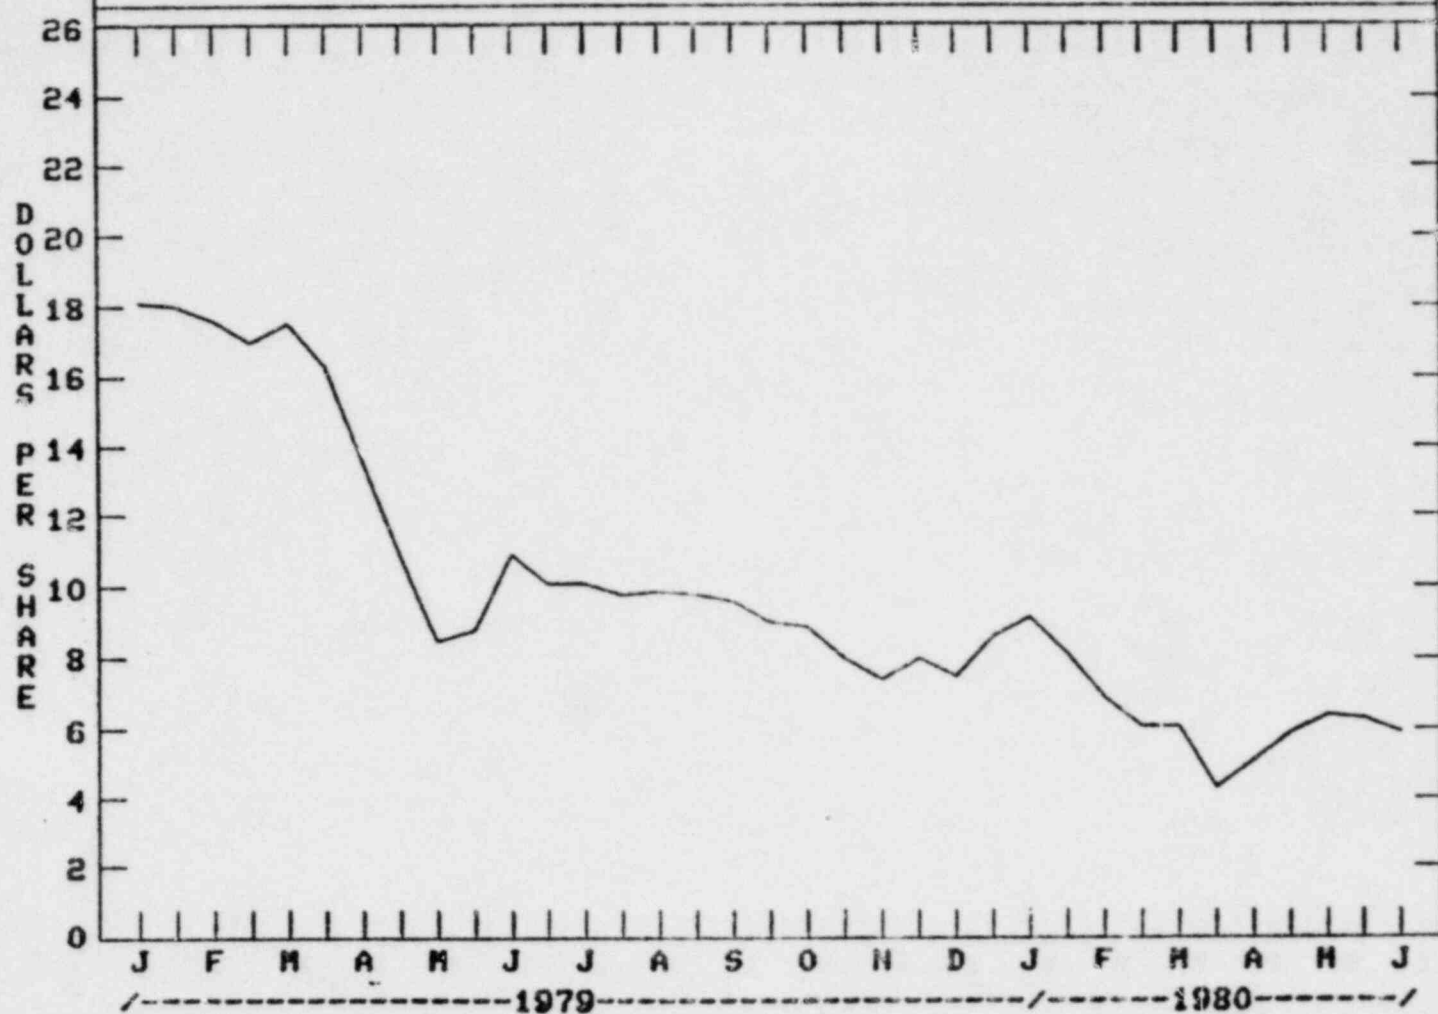

T. G. Howson
