GENERAL ELECTRIC COMPANY, P.O. BOX 460, PLEASANTON, CALIFORNIA 94566

July 7, 1980

Mr. Darrell G. Eisenhut, Director
Division of Operating Reactors
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

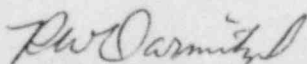

SUBJECT: LANDSLIDE INVESTIGATION PROGRAM SCHEDULE

Additional landslide stability investigations near the GETR have been under discussion for some time. A proposed program was forwarded to the NRC on April 17, 1980. The NRC Staff's Safety Evaluation Report of May 23, 1980, stated that this program provided a generally acceptable investigation program and should provide sufficient data regarding the stability of the hillside deposits for the staff to evaluate the potential hazard.

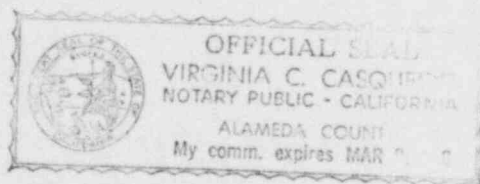

The field program began on June 23, and it is planned that a final report be sent to your office between August 15 and August 29, 1980. It is expected that a Safety Evaluation Report Addendum regarding the landslide stability would be issued shortly thereafter.

The Safety Evaluation Report also recommended that a monitoring program for possible future movement be added. Monuments have been constructed and one baseline measurement made. A report describing that which has been done and future plans will be forwarded to you by July 25, 1980. This monitoring program is to measure distance changes only and is not intended to provide data for evaluation prior to the issuance of the landslide stability SER supplement.

Very truly yours,

R. W. Darmitzel, Manager
Irradiation Processing Operation
