Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington D.C. 20555

Dear Mr. Denton:

I have enclosed a letter I recently received from one of my constituents, Mr. Wendell H. Marshall, concerning a request we made back in October of 1979 for information on the Midland Nuclear Power plant.

He has as yet not received a response, and I also have no record of a reply answering his questions.

If you did answer his original concerns, would you please forward to me another copy of that reply. If you have not responded, I would greatly appreciate it if you would. I have enclosed another copy of his original request as well as my letter to you of October 23, 1979.

Thank you for your assistance and cooperation in this matter.

Best wishes,

Don Albosta

Mr. Don Albosta
Member of Congress
Longworth Office Building - #1318
Washington, DC 20515

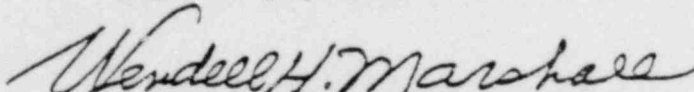

Dear Mr. Albosta:

On the 23rd of October, 1979, you wrote a letter to Mr. Harold R. Denton, Director, Office of Nuclear Reactor Regulation, United States Nuclear Regulatory Commission, in Washington, pointing out that on the 12th of September, 1979, your constituent, myself, wrote a letter to Mr. Denton pointing out the serious situation in the sinking of the Diesel Building and serious cracks in other buildings at the nuclear power plant under construction in Midland, MI.

In that letter you requested that you would appreciate a copy of any letter you may have sent him in response and an up-to-date summary of the situation to which you referred. I would appreciate knowing if you have received anything from Mr. Denton. I would, also, appreciate any information you may have concerning how the Nuclear Regulatory Commission is going to prevent the further sinking of that building and other serious discrepancies in the construction that has been pointed out in the press recently.

I will appreciate your assistance. Thank you sincerely.

Very truly yours,

Wendell H. Marshall

October 23, 1979

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
United States Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Denton:

On September 12, 1979 I received a copy of a letter from Mr. Wendell H. Marshall, a constituent of mine. In this letter he lists 15 questions pertaining to the sinking of the diesel building and serious cracks in other buildings at the nuclear plant under construction in Midland, Michigan. Mr. Marshall may not have noted on his original letter to you that I received a copy of that letter. However, I would appreciate a copy of any letter you may have sent him in response and an up to date summary of the situation to which he referred. A copy of his letter is enclosed.

Thank you very much for your attention to this matter.

Best wishes,

Don Albosta
Member of Congress
